Re: Fort Wayne, IN.
Water Works Improvements
Wash Water Retention Basin
Contract 77-W-1

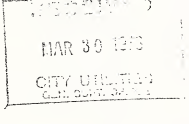
Dear Mr. Stanczak:

Enclosed are seven (7) copies of Change Order No. 1, to the above contract with Hagerman Construction Corporation This change order covers five (5) different items of work and is a total addition to the contract of $22,036.

The first item on the change order covers additional reinforced piling which are necessary to hold the structure down and prevent it from floating in case of a high water level with the structure being empty. The need for this additional piling was determined from the results of the load test that was performed on the site.

The second item on the change order covers making the bottom slab a uniform thickness of 18-inches all the way across and this is necessary due to the additional piling added by the previous item on this change order.

Item 3, on the change order covers welding of the reinforcing bars to the uplift pile casing. This will give a better bond between the bottom slab of the structure and the steel pile casing and this will give greater resistance to up lift.



March 24, 1978

Mr. Ed Stanczak
Fort Wayne, IN
Contract 77-W-1
Page Two

Items 4 and 5, on the change order cover, revisions to finish grading and top slab elevation revisions as well as a change in the retaining wall with all of these changes to conform to the request of the Department of Natural Resources.

Review this change order and if you approve, sign in the appropriate space and process through the other City Departments as necessary. When the change order is approved by all parties, return two signed copies to this office for our use, send one signed copy to the contractor and retain the four remaining copies for your use. You may wish to give one copy to Glen Patrick at the Water Treatment Plant for his information and file.

Very truly yours,

McNAMEE, PORTER AND SEELEY
